Subject Re: Optimist Park letter for Union County

Yes, I think we need to discuss this further. What's to keep them from removing only a bucket load of dirt and calling it good if they can apply for a CLOMR? I thought to remedy a violation you had to return BFE's to the original elevations.

Amy -

I discussed your question with John Gerber. Our feeling is that a CLOMR is an option because the study is based on a proposal to remove material to remedy a violation. If you'd like to discuss it further, we can try to set up a conference call on Monday.

Ed

One question for now...I did not think a CLOMR was an option at this point since the work had already been done.
